

## Education

### Cal State University - Long Beach

Bachelor of Science in Computer Science, Concentration in Software Engineering. GPA 3.40  
Relevant Coursework: Algorithms, System Programming, Digital Logic and Assembly, Discrete Structures II, Computer Architecture & Organization, Principles of Programming Languages, Concepts of Computer Science Theory, Intro to Software Engineering, Intro to Computer Security, Stochastic Computing / Probability for Computing

Long Beach, CA  
May 2027

### Orange Coast College

Associates of Science in Computer Science  
Relevant Coursework: Data Structures, Discrete Structures, Advanced C++ Programming, Java Programming

Costa Mesa, CA  
May 2025

## Projects

### Portfolio Website

- Built a responsive portfolio using React, Vite, Tailwind, highlighting projects with clean UI and accessible design
- Developed reusable components and optimized asset loading to improve performance
- Designed intuitive navigation and consistent visual hierarchy for better UX
- Deployed on Vercel for fast rendering and reliable access

### Dog Tracker Application

- Built a modular FastAPI backend with clean separation of auth, routing, models, and schemas, designed to scale as new features are added.
- Implemented a reusable JWT authentication system and `get_current_user` dependency to support secure, extensible API development.
- Structured database models and ORM setup using SQLAlchemy to allow easy expansion into additional health-tracking modules.
- Designed the overall project architecture and environment configuration to support smooth future development, frontend integration, and deployment.

## Leadership & Activities

### Orange Coast College Women's Basketball Team Captain

Costa Mesa, CA  
August 2022 – October 2023

- 2022-2023 CCCAA Women's Basketball Champions
- Led a roster of 15 athletes, coordinating practices and fostering team cohesion
- Balanced 20+ hours of weekly training and travel with full academic course load, demonstrating time management and discipline

### Live Stream Sales Associate /E-commerce Content Host Greylynn

September 2024 – current

- Host live e-commerce streams showcasing apparel to 100+ concurrent viewers, driving real-time purchasing and conversion.
- Collaborate with inventory and operations teams to manage order flow, fulfillment accuracy, and post-stream logistics.
- Operate in a fast-paced, metrics-driven environment requiring clear communication, rapid problem-solving, and adaptability.
- Worked with backend order systems and live sales dashboards to monitor revenue, inventory levels, and stream performance in real time.

## **Skills & Interests**

**Language:** Spanish

**Programming Languages:** Python, Java, HTML, CSS, Javascript, C++

**Frameworks/Tools:** React, Vue.js, Tailwind CSS, Git, Github
